Stop the Lawsuits!

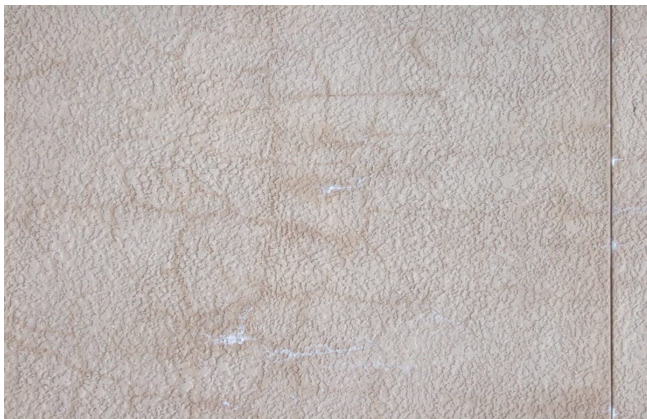

Our Partners

Three prominent manufacturers in the construction industry have teamed with the Stucco Institute to provide the industry with the revolutionary code approved and manufacturer warranted Sealed Cladding System.

Quality Products Since 1932 • DRYLOK® • ZAR® • UGL®

Stop the **Problems!**

It's Time to Stop!

- **STOP** exposure to stucco and envelope Lawsuits
- **STOP** incorrect application of ASTM C-926 and C-1063 Stucco and Lath reference documents
- **STOP** incorrectly attaching lath by following the standards overridden by wind load requirements of the code
- **STOP** using unnecessary and damaging control joints and lathing accessories
- **STOP** incorrectly painting and sealing your exterior
- **STOP** paying more for less – **USE** readily available products
- **START** applying stucco and lath according to the newly code approved “old-way”

Overview

The system manual contains all standard installation instructions and fastening attachments for varying wind loads, densifying requirements, “V” tooling requirements (old school), coating requirements, sealant tooling, and finishing, that will ensure a lifelong stucco assembly installation. Including common flashing, roofing, soffit, and details that prevent stucco failures. **All CAD** details are available for download making plan submission and detailing a snap! The system is eligible for a free 15-year warranty from UGL.
